English  
French  
Russian  
Spanish

## PROFILE

Hi! I am a passionate Front-end developer. I help startups to implement and design powerful, scalable, and secure web applications.

## EMPLOYMENT HISTORY

### Backend Developer at Lotto

August 2020 — January 2021

Lotto is a management platform dedicated to companies specializing in the lottery (New York lottery). It offers a package of two applications: a mobile application for the sale of tickets and a web application for administrative management for these companies. my mission in this project as a freelance was:

- Set up an API allowing the creation of lottery companies and their administrative management (addition of employees and salespeople, management of tickets, monitoring of transactions and execution of payment, ...)
- Set up an API allowing to sell and manage tickets for the mobile application

### Full stack developer at VODEC Mutual

January 2020 — July 2020

VODEC Mutual is a company that operates in finance. Basically, the company makes loans to other companies and individuals. In order to develop the company, I was contacted to digitize their entire system from A to Z. My responsibilities:

- Set up an API that allows to register the company, its customers, their loans, calculate a repayment schedule for each loan, and show its progress. Also a control system for their cash flow
- Implement the Front-end application to access the functionalities detailed above.
- Implement tests to avoid any bugs

## EDUCATION

### Bachelor of Mechatronic and Robotic, RTU MIREA

September 2018
